CASE STUDY

Acoustic Sound Baffle Ceiling Installation

Customer: Gousto

Location: Warrington

Core Service: Commercial Interiors

Sector: Transport & Logistics

Project Details

Client Overview

Our client, Gousto, a leading meal kit delivery service, recognised the need to enhance the acoustic quality of their workspace. This promotes better employee productivity and comfort. The objective was to implement a solution that addressed sound management and aligned with their existing interior design.

Project Overview

We designed, sourced, and installed **80 acoustic sound baffles** to achieve the client's goals for this project. Focusing on the quality of materials and a harmonious blend of design, we crafted a custom look that seamlessly integrates with the client's existing aesthetic while enhancing the overall ambience.

Objectives

Enhance Acoustic Quality: Create a more focused environment for all workers by addressing sound management.

Integrate Design: Execute an installation of **80 acoustic sound baffles**, designed with the perfect product materials to balance performance and style.

Minimise Disruption: Complete the installation without interrupting operations.

Challenges

Aesthetic Integration: The project required a solution that blends harmoniously with the current décor while enhancing the overall visual appeal.

Operational Continuity: Installation had to be executed without causing interruptions to the client's daily operations, which was crucial for maintaining workflow and productivity.

Acoustic Performance: The selected solution is needed to effectively manage sound levels and improve the overall acoustic environment within the workspace.

Solutions

Design Phase

- Our team collaborated closely with the client to develop a tailored acoustic sound baffle ceiling design that complemented their vision and enhanced the area's spatial dynamics.

Product Selection

- After an extensive evaluation of available products, we identified a cost-efficient acoustic baffle system that provided optimal sound absorption while matching the aesthetic criteria.

Installation Strategy

- We devised a comprehensive installation plan that prioritised minimal disruption. We ensured operations continued smoothly by scheduling work during off-peak hours and deploying efficient installation techniques.

Results

Seamless Integration:

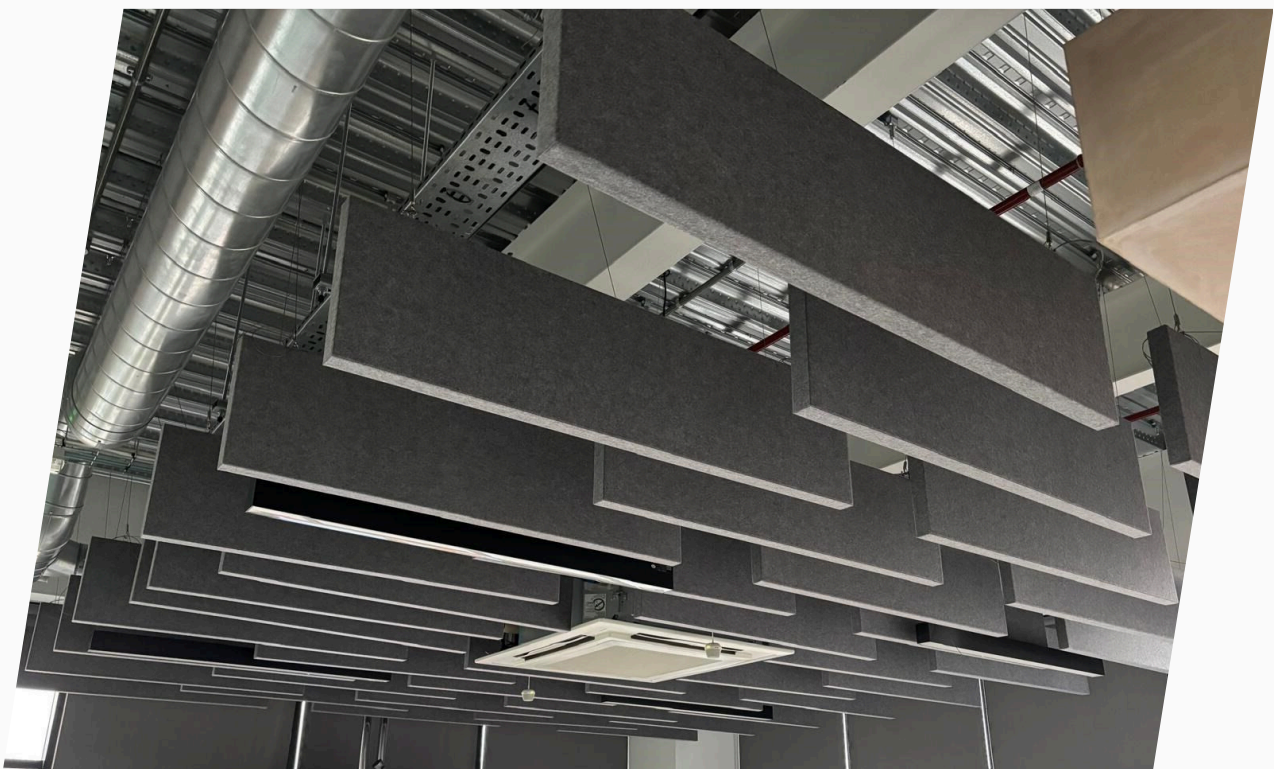

The final installation not only met but exceeded the client's aesthetic expectations, providing an elegant and modern look to the workspace.

Enhanced Acoustics:

The sound baffle ceiling significantly reduced noise levels, improving focus and enhancing employee collaboration.

Operational Success:

The installation was completed on schedule without disrupting the client's operations, underscoring our commitment to client satisfaction and service excellence.

Client Satisfaction:

The client expressed their gratitude for the professionalism and dedication demonstrated by our team throughout the project. They reported a noticeable improvement in the workplace atmosphere, with employees experiencing greater comfort and improved productivity levels resulted from this.

Conclusion

This project exemplifies our ability to deliver innovative acoustic solutions that meet aesthetic and efficiency requirements while prioritising client operations. We are proud of our contribution to creating a space that fosters productivity, well-being, and collaboration.

We're proud to have contributed to our client's ongoing success.
